

## CHAPTER 13

### **Added Mission After Death Experience**

Within minutes of my overdose, I could feel myself leaving my body, slowly drifting upwards to hover near the ceiling, while watching my empty body curled up on the mattress. My thoughts and feelings that I took to bed were still fresh in mind. The feelings of dispare soon disappeared.

Feeling freed from my earthly attachments and burdens, I was at Peace and somewhat relieved knowing Life only gets better now in the real now, for I immediately accepted that I had stepped through the physical threshold into the Spirit World and that Life goes on and on. I kinda knew this but receiving confirmation up near the ceiling made me feel happy and excited.

I know this was not a dream, it was as real as any moment during my 43 years in that body named Kelvin. I had, like US all, only seen images of my face previously; it was strange looking down on me, as others would see me. I offered no expression, it was not a sleepy look but rather a nothing, empty, dead look – just as a dead fish looks.

Although a breath of sadness passed through my mind of the enduring endeavours I had experienced and the fact I was leaving so much unshared Spititual knowledge I hadn't told plus leaving my beloved Tara and Simon in particular behind. I felt very grateful and extremely happy of the lessons learnt for the heartfelt Soul growth to reach this point and to experience the giving of True Love expressions to Melissa that made me feel God like, allowing me to graduate into the Light.

I left my experiences of this Loveless feared world to go to a place where I can freely Love and be Loved. I was confident this was awaiting me on the other side. I certainly do not regret my suicide, however, I do not recommend it to anyone for it is our Souls choice, not our personalities, I heard my calling and saw the signs, my current situation at Kununurra was my

personalities final nudge for me to let go and step into the Light. Our religions tell US it's a grave sin to suicide, but what would they know about Life based on fear, guilt, punishment and control. God does not think that way. Life is never taken only given.

Hovering in midair like a butterfly who had just left its cocoon, I now felt Free to Be. What happened during the chrysalis of my lifetime as Kelvin seemed like a blink or just a dream. Like a soaring White Eagle, I turned my mind upwards and within a blink I was about 100 metres above the house, looking over the neighbourhood. This was comfortable being a Light, everything else was still me with no need to try to keep this body from falling, there was no gravity to deal with and I never was afraid of heights, but if I was that too would not be an issue. I didn't recalling passing through the roof. All the houses below appeared both opaque and translucent – I could feel everyone's thoughts and emotions at once without actually seeing them, even those asleep, there were plenty of problems down there, I could even feel the animals intention crystal clear as well. It did not seem weird to me but on the contrary, quite natural.

I realise it may be difficult for many of US (particularly the academics who think too much) to fathom my explanations from the abstract Spirit World which is certainly a different world, no languages, a sound well beyond audio frequency.

So I/WE invite you to drift off upwards also and come along on this amazing journey into the Light as a Light for all eternity, just pretend you are me for awhile. There is nothing to be afraid of, although we are programmed to fear death, to fear the unknown. It is easier than diving into a pool and opening your eyes or stepping out of a shower.

You will need to leave behind your logic, rationale and practicality. Empty your mind of reason, there is no need to think, it only blocks our thoughts. Trust, like the caterpillar trusts its Maker and does not cling to its old garment and thus is transformed into a beautiful butterfly. Relax, go with the flow you cannot get lost in the Light and we will promise to return you safely and wiser to where you are now at the end of the chapter.

I had no debts, guilt or baggage, just some resentments I was unaware of in my being. We need to leave our old ways of judgement and conditioning behind, leaving our house and contents all possessions and bills behind, have no expectation, there is no place for these here as we are transmuted into a new state of Being of consciousness in an entirely different dimension outside the physical. As mind boggling as it may be to US but the illusion of time and space we have is not here. So open your Minds and Hearts, let's go. Let's journey behind the disc into the Light on the horizon on the treasure map shown within on chapter 14 to find our treasured Love.

I could feel my heart beating with sorrow for how Simon and Tara would feel on learning of my death and for the years ahead without a Dad and answers. Just by my heart-felt thought of them had me within another part blink I was passing through the brick wall to be by Tara's bedside in her room at Harvey some 1700 kilometres south. She was fast asleep like a little baby, (I love her so much) yet I was able to feel all that was floating around in her mind while she was dreaming; including parts of her homework assignment that she was just working on, a girlfriends issue and a dramatic scene from an earlier T.V soapy. There was no real concern with Tara basically she was peacefully asleep recharging for a new day oblivious to what I had just done. As I turned my attention to my beautiful Simon, I was instantly through the wall at his side. To give you an idea of what it was like passing through the wall, its like we imagine ghost do, well it was is if stepping through a wall of sun beans in a shaded area. Simon was contently asleep showing no levels of stress, dreaming he was surfing over a city. I kissed him on the forehead prior to passing by Sue also asleep but tossing and turning trying to unload another full day and unconsciously disturbed of my suicide, I blew her a kiss.

All of a sudden Meeta came to mind to whom I spoke to late in the afternoon. She was still up watching T.V with Ross I could feel her concerns floating towards me hoping and praying I did not suicide. Meeta knew I was at breaking point with nothing and nowhere to go, she had saved me several times previously but felt this was it. Meeta has that motherly instinct

with me, she could sense my danger, knowing I was at Peace with no need to be on Earth any longer, she also picked up on my calling and was adapting to letting me go. I was able to comfort her happy Soul, which seemed to put her mind at rest. In Spirit we connect to the real person, the Soul, and if the personality in connect to their Soul their senses pick up our presence, many people do on the days leading upto a funeral through Love.

From here still in what seemed frozen time, I drifted back up above the houses wanting to be with Melissa who was only several kilometres away (distance is irrelevant), I travelled at the speed of thought by travelling above the trees and street lights, what an incredible sensation in no time I was over the City of Bunbury lights accelerating with my mind, I paused briefly to view the city I spent seven years working in before being in Melissa's kitchen/dining area. Her mind was racing in all directions stressed to the hilt but in organised control, surrounded by newspaper clippings and paper work all over the table and chairs. I was the last thing or person on her mind, I wanted to help her with her frantic election campaign but now knowing that was not a healthy direction for her, I kept out of it. She appeared, while reading, to accept my gentle kiss on her cheek as she relaxed for a second and unloaded her conscious mind while gently rubbing her cheek. As usual I let her be.

From here I moved back up north to sister Pauline in Darwin, who was the last person I spoke to, she was very concerned thinking the worst, so I also comforted her Soul. Knowing no one was upset or aware of my departure at this point but touched for them now would carry through to them once they are notified.

I now have a better understanding how Mrs. Panetta back in Chapter One felt on her death when she connected to my protruding Light in the deli that evening. I connected to comfort my mother Rose, brother Noel and Dinee in Harvey as well as all the Slade in a similar manner, it all took no time. I now felt ready to leave Earth as I turned to the Divine Light.

I was in a most tranquil peaceloving void, it was Heavenly, a vacuum with this incredible seductive and magnetic Light in the distance beaming into connect to mine, after all it is the same Light. My Light was in the Light just as a sunbeam is of the Sun, as I felt I had been here before. It is the Light of God as well as the Light of You. (The same Light, well there is only one Light, most Near Death Experiences are drawn to)

Travelling at God's Speed towards the Light, the vacuum kind of formed a tunnel of Light I guess, encompassed in the Golden White Light This Light of course, is the same that I was consciously returned to, engulfed in, back in 1976 from my burning bush Kundalini episode. The Light emanates beautiful luminous, iridescent rainbow colours as seen in our detergent suds under sunlight, the silvery rainbow holograms. IT is so seductively magnetic, even spellbounding, bringing about a remarkable sense of Loving Peace and a wonderful rapturous bliss, a joyful feeling that words cannot really explain, I just felt like giggling, falling in complete Love with all of Life with God and Unconditionally Loved in return by All as if the entire Universe was applauding and welcoming me/US home, an awesome Homecoming. What our Olympians experience on winning Gold is but a drop of the excitement.

Along the tunnel just like my N.D.E of 1987, I saw all points of view to each situation not just my own, plus you see the overall view point from above, Gods View. I was clearly able to see my Spititual growth that accelerated from my last update of 1987, and pleased I choosed the courses I took to become a Wounded Healer. Like any schooling you focus on the lessons learnt not all the homework or the detail learning experiences, the mistakes were a great part of the learnings. It showed how over the twenty years since my Kundalini how all my trial and tribulation were set in place for me to help put all those pieces back together in lifes puzzle to see the Big Picture of Life again, it was all meant to be. On a physical 3 Dimensional level I managed that through expressing Unconditional Love for Melissa to return to The Source in my

conscious mind, by this I obtained my Soul Purpose of Self Mastery. Now I shall tour about in amongst the Big Picture of Life, to check out all the threads in the Grand Tapestry.

I was feeling completely unattached to time and space, that's hard to imagine for US humans, like Oneness, its hard to explain one needs to experience it. Even while visiting Tara and Simon and the other loved ones it was their time and space not mine.

. In the majority of all cases of N.D.E. that go into the Light tunnel we are greeted in Holy Communion with the Divine Light as if the arms of Jesus or Buddha have embraced US in complete Unconditional Love, or is it really your own Higher Self (which is all the Masters too) that embraces US to feel purified in a Blissful orgasmic state of falling in Love with God and all Life before returning back to our body.

From here I was with all my four grandparents, we were all so excited and Loving towards each other, not that we were the other we are all the One in various forms. Both my grandfathers had died before I was born, so this reunion was so special. I really Loved my Granny Letica, mother Rose's mother. I always wished I could of spent more time with her, both my grandmothers died in there eighties when I was in my late teens. Granny told me she has never left me and that while she is here happily with Stanko in Light now she is also reincarnated in my daughter Tara, that was so beautiful to know and made sense to me cos I always felt Tara through me and Rose's lineage. Stanko came in to say he is also Simon. And yes Simon is working with the mines too like his great grandfather did to lay foundations for a better family future also.WOW! I asked Granny and Stanko if they were also cousins as well as husband and wife in their last life since cousin Dearne mentioned it to me and they said they were, and needed to flee to Australia because of the catholic religion to be together. It wasn't a big deal in the Slave culture but was in catholicism. They said they had been closely bonded over many incarnations and Family was the most important thing they lived for and are there to help me

along with Simon and Tara. Yes, Tara and Simon do have a very special brother sister bondage as close as identical twins carry.

Nanna McKenney also Loves me so dearly and is always there with the others and she informed me how she was married to her son, my father, in a previous life, thus there was such a strong bond. Gives reasons why she left him, not her other children, her entire house in her will. She also emphasised that when ever I feel a need for help back on Earth to be sure to call upon her. My other grandfather Francis is a Master, I love him as God also, he had so much to offer but was used and abused too much to become stuck in a rut. It was He that inspired me with United Society and World Focus. They all showed how proud they were of me for my Spiritual advancements and will continue to be of great support and assistance. The way the communication flowed it was obvious that my earthly mission wasn't complete. We were together for what seemed forever. What a wonderful treasured reunion, WOW! Thank You, Thank You.

What seemed to be occurring all at the same time like another layer spontaneously happening, since in Spirit you can be and do so much at once. It was made known to me that back on Earth I, My Soul, had incarnated in three bodies that will connect in time, this was very rare. I was having a ball celebrating amongst all the great Master Artist of the Renaissance period, we where all of the same Light, all expression of one another, each of US could, without any effort paint each others masterpieces. We shared in all latest works, they're instantly manifesting as we spoke of how the world is now plus works of the coming Golden Age. We were all estatic creating during the new Golden Renaissance. We instanly manifest as ideas rose, the paintings popped in and out just like our words, we communicated through our images not audio. The 2013 plus art was all in a holigraphic form with amazing irredecent, metallic, and fluro colours all combined to be 3D, a far greater range of colour that we are seeing on Earth today. The art was alive moving within the frame just like the new 3D movie. A visual

conversation. We are true Brotherly Sisters. We just played I imagined a icecream with various berries it was instantly there for me to lick (not that I had a physical tongue) as I changed my mind for a different flavour so did the icecream, instant manifestation. We all had glowing bodies in our original grand character at our primes.

My Dearest Angelic friend in Faye, in all her Glory, was so pleased and proud I hadn't fallen to the greed of the corrupted art market of capitalism and ensured me I will soon flower for the world to see and learn from. She also mentioned how exciting it is going to be when I uncover my great Egyptian and Mayan art and explain the messages layed down centuries earlier for these times. Faye confirmed that by me expressing Unconditional Love to Melissa and overcoming the mental health system also freed Vincent van Gogh of all his great sufferings, I understood that. Also my Dear friend Leo, from our Town Planning days was there to congratulate me also from keeping true over the years and not becoming commercial with my art, he had so often given me warnings about that when he was alive on Earth. "Keep True to Youself, don't sell yourself short." he would say. They were, they are so Godly, so beautiful Divine Beings emanating glorious Light and Love, what a pleasure and honour to be with them in their Glory. Love them all so much. They shall see the dawning of the new day of Photon by simply stepping into it.

It was at this point I could of returned to my body, but my earnest and enquiring mind with my sincere heart for humankind asked to explore more, to see the Universe in action to be able to understand the problems on Earth moreso, as well as other Life. Trusting what ever I choose to do is going to be just Perfect and meant to Be, my mind was open to All.

Before moving on, are you still with me? Don't go back now, it really gets more fascinating from here. I like to mention a little about this Heavenly state to help put you in this headspace, before meeting the Angels. For it wont be long now, 2013, those of US on Earth will be the modern Angels in this Heavenly state amongst our new Live Lighten Mothership earth.

nature and essence of the Self. To reconnect to our Divinity. To help overcome our Spiritual amnesia to enlighten US that we are the Light, we are the essence of God (Godly Goddess) we are ONE. We are to be God Personified, we just need to open up and allowing God to become US. Earth can house up to ten billion humankind individual equal parts of God all being totally God. That will happen soon, so hang around, it may take until 2100 AD as such for US all to get it together.

We really are Almighty Supreme Beings, under our Creator, wholly (Holy) connected in infinite fragments, a part of the whole. God is whole. To help those amongst US feeling single minded alone separated out on a limb I can explain it metaphorically. Consider ourselves to be born as a pure single raindrop landing from the Heavens into the Ocean to become fused together as the Ocean of Wisdom, the Ocean of God knowingness we are still the drop and the Ocean at the same time. We become God, having the Universal Mind of God, we are both the centre and circumference of the Universe. Unfortunately since The Fall, The Separation 32,400 years ago we became contaminated, confused before reconnecting to the Ocean. Let's say some of US enter into a situation in society to be contaminated, corrupting that single chemical drop that slowly finds its way through the gutters drains to run into the sewer, some remain stuck and stagnate here in the mainstream while others of US land or swim up-stream to flow naturally into creeks then rivers into the Ocean to also be One with God. This is the root I took.

No one is perfect yet, otherwise like Jesus and others, in this current world we would have no need to be here. Some have stayed on as Spiritual Teachers to help guide US smoothly into Photon Energy. It is US that have created good and bad in all people, just imbalances, there is the inseparable yin and yang of Life. The God in all life has fused all together to be Perfect Balance in ALL – God is not good or evil, that is only a figment of our imagination is it not. God never created sin, man did. God does not judge, interfere or lay down commandments, God

Since the years from this suicide I haven't explained the three hour eternal journey into the Spirit World to anyone in length, if asked I would consider the sincere willing interest, seeing is believing for most still. I've kept it quiet for over ten years until the Tyme Haz Kum 7-7-07. when Harmonic Planetary Shift opening human awareness as did the Birthing of the Divine Masculine from the Divine Feminine in September that year.

Nonetheless, in recent years we have been exposed to quite a lot of testimonies of people from all walks of LIFE having their unique Near Death Experiences (NDE) and Spiritual religious people having experiences with the Light, God and Angels. Books have been written, movies produced, There is a lot on the internet, they all appear to carry many common threads.. Mine may help some readers so I will touch on some of my N.D.E. or should I truly say from this point forward it was an After Death Experience since my Spiritual silver cord that stretches our dreams out to the cosmos was separated from my body while I ignited by going Into the Light and Beyond.

Only yesterday Tereza drew my attention to author Cherie Sutherland's accounts of N.D.E.'s in "Within The Light". They all interrelate just as I found the numerous dreams people in the S.W. of W.A. have had over years on the 19m Tidal Wave that washes over the City of Bunbury in the near future. Various glimpses of the same event.

Whatever I say if it insults your intelligence or revolts against your reason do not accept it for your Soul knows the truth and will make your personality aware when appropriate; may it be now or later in your growth.

I am, We are, a Being of Light, it was as if I as Kelvin was a minute speck, a single sunbeam being drawn back into the ever Bright Sun and as I became closer I fused, ignited (Geeboom) into the Sun to be IT in ONENESS. A Supernova in reverse coming together not apart. That is the best way I can think to compare this encounter with God. Those of US having experienced the Light know exactly what I mean. The point of contact was like a Big Bang, a

Supernova, my mind exploded into the Universal Mind of All Knowing. IT's Awesomely Divine!!

My individual conscious mind of Kelvin then exploded into a Universal Mind of All, my conscious-subconscious-unconscious became One just like that conscious time of ONENESS of my Kundalini experience in 1976 and the way I felt at the sheep sale when I connected on the farm back in 1993. Oh! It was absolutely Heavenly going into the Light. Phenomenal.

All my pains of sorrow and suffering from living over countless lives were instantly healed, washed, melted away.

This is LOVE – True Unconditional Universal Love. It was at this exploding point in the Light, I lost the contact with the body of Kelvin, it seemed as if this ever expanding elastic silver cord snapped like an umbilical cord at birth is cut, this cord was broken at death. The adventure of my blissful and glorious death was the opposite to my most traumatic day at my birth, explained in Chapter 4, both worth applauding. My first inner breath and my last outer breath took me into the wonderous VOID with God. In its nothing All was revealed.

The Supernova of Light wasn't instant, it carried for quite a while, never really seemed to end. What ever thought entered my mind or any question, it was immediately answered. When I wished to be in Holy Communion with the Archangels. Well my Light expanded forming this huge glorified figure (that all Humankind will have by 2100) like that of Jesus as explained and seen by the three apostles at the transfiguration, the Light then expanded, transformed into the enlightened perfect glowing Beings of what is understood to be Abraham, Jacob, Moses and Elijah and in a flash of Light, each of their lives were relived before me/US from which I was able to relate to the world on earth today. There messengers are even more relevant and important to US today then in those days.

The projecting Light from these four great prophets continued to unfold where I was then transformed into the magnificence of four Mighty Angelic Light Beings. These Great

messengers are the Archangels known to US as; Michael, Uriel, Raphael and Gabriel . I knew my personality in the flesh of Kelvin would melt, dissolve, in this combined energy presence.

What do we know about these Four Grand Angelic Masketeers :

*Along with the purest aspect of God, the Almighty Gold and Silver twin rays of Creation, these four Archangels are also working in conjunction to raise humanity into the higher Christ – Consciousness for a Golden Age of Oneness, a time of Rapture. This will be the Second Coming of Humankind with a New Heaven and a New Earth amalgamating. A glorious Star of David you could say.*

*Archangel Michael is said to mean “Who is like God – Godlike”, He/She is a warrior, protector, healer, guardian, in charge of virtues; an Angel of repentance, righteousness, mercy, revaluation .....Michael was mainly projecting a beautiful electric Blue Ray of Light, Peacemaker.*

*Archangel Uriel is understood to mean “Fire of God – the Light of God”, seen to focus more about the order and justice of Life. In the book of Enoch, Uriel is referred to guard the Gates of Eden, I believe all the Archangels guard the covenant, the doorway to God. Uriel is also considered the Angel of Salvation.*

*Archangel Raphael is said to mean “The Shining One Who Heals”. We have learnt that Raphael is strongly spoken of in the Catholic book of Tobit. An Angel of Healing and exorcism and of a compassion to guide US all on our journey to safety. Raphael is an Angel of the evening winds, guardian of the tree of Life, the Angel of prayer, peace, joy, Light and Love. In charge of Healing the Earth, in charge of climatic conditions. The shining Fire of this Mighty One uses the forces of the air, amalgamating fire, water and earth so as to transmute them into healing forces, working and moving in the cosmos, very active in the present time on earth.*

*Archangel Gabriel means the 'Mighty One' 'Gods Messenger'. Our Holy books shows Gabriel in our presence with the re-birthing, being in charge of The Tree of Life. Gabriel was with Jacob, guided Noah with the new Life, was the Archangel with the Virgin Mary with Jesus' birth and also rolled the tomb open to free Jesus to the Heavens, the resurrection of Life. Gabriel will be having the main play in our re-birthing of humanity and Life on Earth on the Awakening. I saw Gabriel radiating a wonderful Reddish Ray of Light.*

*The four Archangels maybe have separate roles yet are equally the One who are also from the Silver and Gold Ray. These Great Rays are the purest and closest vibration of The Divine Godly Source that is the VOID and all voids. All that is outside the voids are expressions of The Almighty.*

*Forever in the first Universe all was and is created in Perfect Balance and Harmonised to be truly Peaceful. The ideal Heavens of Heavens, the home of Jesus the christian might say. From here other Universes have been created as experiements of alternate ways to Be, not that they were needed, but creative Life continually expands. There are many Universes out there, each growing out of the previous. Our universe has unfolded in its dualities where in the negative and positive, the good and the bad the imbalances of the negative created evil, Satan. This has poorly effected the entire Universe and our planet Earth holds the Key to the next move forward. Godness remained in the Perfect Balance throughout the Universes.*

*In this Sacred Holy Communion with the Four Archangels from my questions of where Earth is going my Light would next change into a even Greater Light making our bright Sun seem a twinkle as my Spirit automatically raised my Light Energy Frequency to be inside the Gold and Silver Rays of Creation, the twin pure expression of God, I guess the clsest one could ever experience the Source of God outside the VOID. All of Life was explained and discussed to my Being here and all the books ever written on Earth would also not cover what was shared. What happened here is unbelievable and uncomprehensive in that I was shown or taken on a*

*guided tour, to speak, of the First Universe that is hundreds time greater than ours. Every facet was purely God expressed in absolute Perfection as mentioned the Perfect Balance and Harmony all at PEACE. A Perfect role model that has been implanted in my Mind and Heart.*

*It was from this meeting as such a New Universe is to be given Birth from Earth and I was to return to help in its Conception. The last thing I asked God as I suicided was could I return as either Melissa baby boy in 2000 OR later in that decade as Tara's daughter, sure that could of happened. There was no choice here to be made, rather a privalege to return now to be part of this glorious Transformation and also to guide Tara and Simon into Mastery for the final stages of our current Universe in thousands of years into the future to end the War of the Worlds for ever more to bring Satin or dissolve It into Balance and Peace. There is so much I could share about this period between now and 10,000AD that involves the entire Universe. But that another story for a later time.*

*From this point The Gold and Silver Rays informed me that they as the One pure expression of God are overseeing the Earth now to Heal Her for a New Birthing and has Itself at another level of consiousness, at the 6<sup>th</sup> Dimension formed into nine Spirit Light Beings to work on means to clear the positive Loving growth of the Universe. My views on Equality and Partnership as individuals through a Oneness web was appreciated and I shall be fully supported with its implications since it has been Gods intention from the very beginning of gifting US Free Will.*

*To understand the events that are occurring behind our backs on Earth today and our true current situation WE need to know of the true hinden history so I was taken on a tour of our Universe by the Nine Spiritual Beings of Gods Light during its entire 15 billion year past, present and its future. Seeing its unfoldment from its first breath to where it is now, coming out of one Void with God to create one Galaxy after another Galaxy, experience a supernova and*

*going into the core Light energy of a Galaxy to bring new Life out of the Black holes Void. From all this it showed how Life unfolds.*

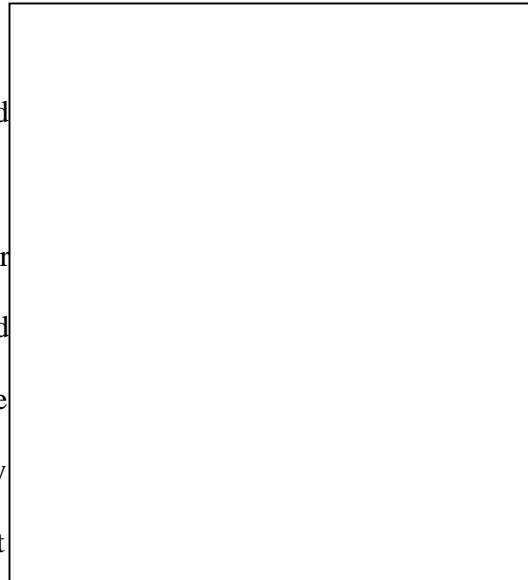

*I was shown how our Solar system evolved and created planets and moons. Saw Venus, Mars, and the planet, that is now shattered into asteroids, in their former glory and how the reptoid/dinoid civilisation brought about their current state. Over the last 26 million years human through various forms have battled to come and go prior to the Native indigenous human stepping out of the Biobola Chimpanzee about 5 million years ago. Earth would fall to how Mars is now if it wasn't receiving Divine intervention, galactic assistance and the fact that Photon Energy is on our door step. I see now the importance of our planet Earth how it has bottlenecked, virtually plugging up the growth of the our Solar system and the entire Universe. And through LOVE it must rebalance NOW to free up all in the Universe. Our most beautiful planet in the Universe holds the key to the Universe's future, all is focus on our next move. Earth contains a little from all other stars in its dense matter where it has been created as the school of Love and Wisdom, the Universe's Library really which is about to lighten up to be glorified to its Sacred Perfection (a tidy up) to be a Heavenly Earth (hEart) as all cycles and rhythms converge after 206 million years into ONE at the end of 2012 so as to house All Divinity in Life. We hold the Golden Key to Free up Ourselves, the Earth and all there is in the Universe, a huge responsibility that I for One is willing to take, are WE together as Stewards in our Future?.*

*Of Earth's 5 billion year history Mother Gaia has gone through some incredible changes, it has been totally rearranged several times over with its many ice ages and is about to reform Herself once again. Gaia is very soon going to have a face lift, a beautiful Divine touch up you might say. And we humans who give up the 'human race' to be humankind again will also go through a corresponding face lift and remodeling to be like we imagine Angels to be here on Earth. The Heavens and Earth, the Spiritual and physical are merging together. So don't hang onto our old body clothing of a caterpillar and the conditioning for we cannot fly or*

*move ahead in our coma. Let's open up our wings as the butterfly has to fly into our Divine Humaness.*

You really need to leave the physical formation behind as I did. In the Spirit World all is Light radiating its own essence at various degrees from the astral plane upwards. This Kurlin photograph shows my aura in 1995, it is a Spiritual vibration. There are no shadows, no solid matter, size is not a factor either.

It is an entirely different dimension, forever changing with the control of the mind generated from God within. Those amongst US who have seen the Robin Williams movie "What Dreams May Come" are given a glimpse of what it is like, at

will help you open up your mind. Also the movies "City of Angels" derived from "Wings of Desire" may help loosen up your imagination and visualisation.

On dying, I understand we are all embraced with the Love of God and our Soul reviews our Life experiences during that lifetime, we only judge ourselves. To judge is not a way of Life in Spirit with Oneness and Unconditional Love. Depending on how we have just lived on earth is whether we continue on in Spirit in a Heavenly or a hell of a state. We are all accountable for our thoughts, words and deeds, our actions.

In my case, I hung out with the Archangels who united to focus on Life, reassessing the Big Picture shown to me by God in 1976 in my studio. These Angelic Musketeers showed me my role and direction giving me a Grand Tour of Life on earth before time and well beyond it into the period of 1000 years of Love and Peace soon upon US. It would take more than the worlds volumes of books to explain or describe this mammoth journey; it is all recorded in my subconscious and in our Unconscious Minds, available for everyone to tap into.

Here I was invited into the Mind of God, of All Knowing that many fellow N.D.E.'ers have also entered. On returning our conscious mind separates again, retaining very little at first, until the conscious, subconscious and Unconscious are in communion again. In meditation.

*In our literature we can read that we all have Guardian Angel and Spirit Guides by our sides at all times. Well, yes, I can accept that I call mine 'NGang', I gather my Guides are past lives, in the photo of my aura you can see seven Spiritual Guides above my head.*

*Angels are believed to be intermediary Beings between God and humans, heaven and earth, advanced Souls who have manifested themselves to humankind since the beginning of history. We categorise Angels into Seraphins, cherubins, deminions and powers. These Archangels are the highest form and closest vibration of God in this form.*

To most of US with closed hearts not yet connected to our inner core find Angels only in pictures on cards and walls and as statues in gardens and to be a profound mystery, as deep as the mystery of the Soul and as limitless as the mystery of infinity and eternity. The more we discover the mystery to ourselves the more real Angels will become.

Same goes as far as ferries and elves, they are beings from the etheric realm that have been here on Earth as Nature Gaurdians since approximately 870,000 years ago. As an gardener and Nature Lover I say they have done a great job as Steward in the Oceans and on the Land. It has been extremely difficult for them over the last two hundred years due to mans abuse to Nature. We do not see any records of insects, small reptiles, birds ever having a cival war or war of any kind. It is only the human species that harm and kill themselves at a large scale and to cause extinction to human societies and other life forms. In general humans at large no longer hold the right to be here if it wasn't for the minority amongst US giving out our Divinity for growth.

Rosemary Ellen Guiley has written much from her interest in Angels, telling US that our monotheistic God is imageless, formless, abstract and remote in IT's purest state of Light and Energy. And that Angels, upon whom we project a form that is an exalted image of ourselves, help US to feel closer to the Source of All Beings that is too Powerful to be near.

The world's mystical traditions teach ONENESS, that everything is part of everything else. Quantum physics tells US that there is no separation between object and observer, that we are inexorably bound up in what we think we merely observe. Consequently, I believe we and the Angels are part of each other, the good Angels can be seen as an expression of our Higher Self (and the demon as an expression of our lower self to speak). The dynamics between the two, high and low, are what psychic integration and Spiritual Growth are all about. We see in our streets those amongst US that are more Spiritual Minded and open to Angels and Ferries are more Peace Loving while others with a closed heart and mind unacceptable to Spirits, lean on the cynical side of abuse and violence, living in guilt and fear.

Through my Spirit of NGang, my higher Godly essence, I accept my ageless four wise Archangels to be the Higher aspect of my Self, which in turn are also yours. These four Grand Knights in glowing shiny armour are Great, Great Knights of the Round Table, sitting by God's side, Gabriel to the left, Michael to the Right .....

At one point I recall NGang at the Gates of Eden, to speak, with others as a gentle and powerful Rainbow Peacemaker projecting White Light from my Being with a long cape trailing behind with brilliant spectrum colours. Stirling silver armour, wearing weightless magical boots, turbo jet like able to propel and bounce off anything. My long white silky hair was my helmet, carrying the D.N.A. of humanity and the animal kingdom, holding All Knowledge to use Wisely. Like Samson, my strength is in my hair. I carried a Gold, Silver and Bronze Peaceshield in one hand with the Silver peace sign in a Gold heart with Bronze background. In the other hand I held the Sword of Truth with razor sharp cutting edges on both sides to have an answer for

everything. Around my neck I still wore the Crystal core of my heart, it wasn't the glass one Kelvin wore but the Soul Crystal pure as diamonds, with the amazing titanic cuts with convexed facades to emanate and reflect Light in all directions, to see All things, encompassing All, housing the Holy Spirit.

With this Godly armour, NGang is prepared to step into any Shadow of darkness, geared up as the Celestial Knight. We can all be Celestial Knights. It was agreed that I return as a Free Spirit through the body of Kelvin again with an added mission for humanity.

By consciously travelling through humanities history into today, I could clearly see US in our deepest ebb ever and how all of US in Spirit are in unison as a mighty army of Peace Lovers to give Light upon Earth.

So many Souls over hundreds of thousands of years are returning to earth for this final opportunity of transition into the Divine Light – Photon Energy – of the Heavenly realm, approaching US here on earth. No wonder our world population is so high, at six billion and growing. I only see hundreds of millions physically entering this Divine Light and Energy. Never previously has this Spiritual and Physical marriage occurred on earth or anywhere. It is to be the Absolute, Ultimate (Ourtopia) and we can all be part of it, it is our choice, so don't screw up.

At present, we humans, overall, are so attached and accustomed to our possessions – both in materialism and in relationships – to be enslaved by debt and guilt. A friend of ours, Phil Laut, once explained that guilt is the fear reaction to what we may perceive as an unsafe universe. Guilt is its own punishment.

This burden of guilt that we so often carry upon our shoulders, must be off-loaded with all our other baggage. We will never be in Peace if we hold a grudge or blame anyone or anything for our misfortunes. We need to forgive, let go of all attachments to thoughts of

revenge or retribution. Forgiveness is emotional disarmament; it is the path of the return to innocence. If we are feeling guilty over anything we simply need to forgive and be rewarded.

Innocence is a state of Oneness with ourselves; it is a state of now knowing. This means that our perception of ourselves is free of past knowledge or conditioning leaving US free to function in present time, to live in the now. Pre-schoolers happily demonstrate this Godly innocence, purity and honesty that US as adults have lost during our upbringing in society's system, many strive to regain their childish innocence to free the child locked away within.

Jesus always focused on Forgiveness and the importance to let go so as to achieve Love and Peace. All our wars (domestic and international) are developed from blame – guilt, look at the prolonged Middle East. Jesus tells US to be as an innocent Little Child and turn within to the core of our hearts as He did to the Kingdom of Heaven. Looking at our treasure map in the painting of Chapter 14, we will see the most powerful message on the silky blue peace banner in front of the elephant (Soul) Jesus quotation reads:

*“Truly, unless you change and become like Little Children,  
you will never enter the Kingdom of Heaven”*

Only the Spiritually Child Minded ones amongst US experience Absolute Happiness, this is the Truth. Our unfolding adulthood is governed by our childhood upbringing and by the society and religions that surround US along with those Souls that have associated with US to teach US the necessary lesson we need. We are all well tested in our daily lives, especially now in this final examination. It is true that our Souls choose our family members and the life best suited for our Spiritual Growth, Soul Progression as uncomfortable as it maybe at times.

Various religions' bells are ringing out for salvation, encouraging US to look outside for salvation instead of within. Jesus the Christ is the Truth, the Way and Life, yes an excellent role model for US all but we can also be the Christ too, by taking the initiative by exploring and

discovering ourselves to become our own saviours, that is what Jesus aspired for US. Our greatest challenge we all have in our lives here on earth is simply to discover the mystery of ourselves and in doing so we will discover God along with everyone else. Once we came to realise that all Life is a hologram and part of a web and important in relation to all other aspects of Life, we will then achieve Peace. We are all individual, unique threads of equal importance to this Almighty Tapestry of Life, we are all a part and whole of the Big Picture.

Even now, separated from my vehicle, Kelvin's body, back as a Being of Light, One with the Light of God, I am unable to describe God's perfect balanced energy and true wonder in our terms as humans, for it is beyond our mortal conscious minds ability to grasp. Only those of US who have been touched with the Light from an awakening or N.D.E. will understand without saying the wonderful sense of inner knowing and ONENESS. When questioning Life when in Spirit, the answer of knowledge could fill many books in a single breath or thought. All this God magnificence is within each and every one of US and available at any time we so choose it. What a gift. A gift of expression and immense blissful joy. Yet we deny it or ignore it by trying to create our own false artificial happiness (abusing ourselves, our minds with booze, drugs and sex) all because of free will. Free Will is our greatest gift; we need to cherish it.

Now in Spirit, I question who is living in the fantasy world, nothing plastic here, no mind games, no barbie dolls, it's real and beautiful.

By having a disciplined, earnest Mind and a sincere loving Heart, will attract others because under the surface of the propaganda governments and religions thrust upon US and the bulldust we carry, we are really all the same Christ.

Being in Spirit I had no need to hold onto any knowledge in my narrow conscious mind, it was used more like a sieve, gathering information and passing data directly onto my memorable subconscious library we as programmers do with our computers. In Spirit the conscious, subconscious and Unconscious work together as ONE in communion.

Since our Minds along with the Love in our Hearts, is the most important factor of US, let's sit back in front of our man-made computer and compare it with our God given one.

Firstly, in reality, our Mind does not consist primarily of the conscious woken mind; in fact the conscious mind is less than 1% operating when our brain waves vibrate between 7 and 28 cycles per second during the beta and alpha states of consciousness. There is much, much more to Life than what we see. When most alert and concentrating near the 28 cycles, we are furthest away to our knowledgeable subconscious memory bank, which sits under 1 cycle per second. It is at that trance, relaxed point, about 8 to 10 cycles just prior to sleeping or power napping and when we just wake when the conscious and subconscious merge. The sleepy conscious loses control, allowing the subconscious to take over. Ideal to relax during exams to raise answers stored previously. In Kelvin's later years, I was able to wind down to alpha state at a click of a finger, to have power naps at will, where 10 minutes is equivalent to two hours of normal theta sleep.

Our conscious mind does all the thinking, it compares to the programmer of our mechanical computers, it can make mistakes, feeding incorrect material to the subconscious/disc which in turn accepts everything as truth, for it does not reason, use logic, think or work out problems, not knowing the difference between right and wrong or real and an imagined experience. It is our conscious/programmers mind which is only capable of handling one or two ideas or items of data at a time. That is why the more we concentrate the less chance we will be able to pull answers or information from our memory. When we misplace items we should stop thinking and stop looking, then we will remember where to find them. Our parrot type education system expects US to recall and repeat everything in exams. We should be taught how the mind works and how to use it. 'Where's the manual?'

Our subconscious mind is amazing, occupying nearly 10% of the Mind, is capable of recording up to one million impressions per second, accepting and recording everything our

conscious mind throws at it, just as our disc records all the programmer feeds it from the keyboard. Amongst all these impressions they come from all the six senses, records emotions, atmosphere, moods, all types of vibrations and colour, spiritual content as well as physical, you name it, it's recorded it

Furthermore, our Universal Unconscious Mind contains everything occupying 100% of our Mind, but does not override our free willed conscious. This is the All Knowing Godly Mind N.D.E.'ers have tapped into while in Spirit. During the 1000 years of Peace, we are soon to step into, the All Knowing Mind. Those of US on earth will live in Divine Oneness with a wholesome Mind and Loving Heart.

To have a wholesome Mind it must have a heart's Love, requiring a balance of intellect and intuition in our thoughts. A thought is a live energy, moving its intention into reality, if negative and misused, can blow the world up and if positively used with Unconditional Love, can Heal the World. We should all strive for this God Knowingness; it is always with US, waiting to be discovered.

Meanwhile in the Light, it was decided and agreed with my Soul that I, my Spirit NGang, return back into my old body of Kelvin, as a Free Spirit. My Love between my children is too strong to cut short our relationship and only just begun. Containing an endless well of pure water, I the Aquarian needed to wash the poisonous misperception and resentments away and give to any thirsty person reaching out. Having only travelled Australia, there is still so much more on earth to see and learn from.

Before returning, I was greeted with Love from my deceased relations and close friends again or did I actually leave them in my supernova??. Even though some were reincarnated, all were present in the Spiritual reunion and celebration. We were all in raptures on the verge of giggling with excitement. There is so, so much Love in the Light of US all. My two grand

fathers were so pleased and proud, we never experience ourselves together in the physical. I was so happy to see them all happily together, my kind hearted Godmother Ann, back with my Godfather Abbey, in a wholesome being. The wise old Souls of Fay, Jack and Leo who loved and believed so much in me when on earth, were majestic, glowing, like glorified Merlins. Our glowing, invisible arms embraced together into a ball of Light for we could all see into tomorrow, looking forward as we connect again on earth during the Time of Rapture with the coming of the Light.

From the glow of Light, just before I emerged in no time to be near my body, I requested to travel through the Universes, Galaxy's, the Milky Way and our Solar System. WOW! How can I explain that, NASA would be mindblown. On re-entering into the room I saw my still curled up body on the mattress on the floor; the clock was now approaching 2am. The eternity I spent away need not have taken the three hours; three seconds would have been the same. My face was now a cold, pale bluish, purple, cloudy white shade. Amazing how much the body of Kelvin decomposed in just three hours. Without the normal flow of blood, the brain and heart collapsed, as did other major organs and glands, my hair looked lifeless, like a wig.

I consciously recall my re-entry very clearly. It was, how can I explain; imagine coming out of a bitterly cold, wet, stormy night, saturated, battered and bruised, then stepping out of the drenched clothes to have a wonderful relaxed, warm, bubbly spa bath – essential oils, candles, the lot, heavenly music, drying off then entering back in to those old cold, wet, muddy clothes – a bit of a shock to the system. Like diving into a cold swimming pool. As my Spirit fused back into every single dead cell, like a cold shiver, I mentally shook to ignite each cell with Love, the Light and Energy, just as if plugging in a robot, all chakras started to glow again, I was ALIVE again. The new Kelving, the old Kelvin died. While all the body parts settled in to normal functioning, I laid still in a deep delta sleep for three days. The G in KelviNG is silent, as is the G, the first in NGang. The 'G' represents the Godly part of me/US.

What a contrast from my traumatic birth explained in Chapter 4, to my glorious blissful death, you would think the opposite. Please don't try it your time will come, remember it's your Soul choice to return to Spirit.

About 6am on the Saturday, Steve woke, finding my empty tablet bottles in the kitchen and unable to wake me, called the ambulance. I was placed in intensive care, it was thought I went into a coma, it was not until Monday morning that I regained consciousness fully, after stirring on Sunday evening.

As I began to open my eyes, I could feel and smell the clean white sheet to recognise that I was in a familiar hospital, the label on my wrist confirmed it.

I knew I wasn't a beautiful baby girl, there was no Melissa, I was kind of disappointed personally to be back, preferring to stay in the Light until the next century, after the dust settled.

Still half asleep, when a mature angelic nurse came in bright eyed, with a loving and caring smile.

*"Good morning Kelvin, welcome back to the real world"*

*"Real? Where am I? Who are you?"* I asked in a puzzling voice.

*"I'm your nurse Jenny, I've been trying to wake you since Saturday morning, it's now Monday"* Jenny replied.

*"No, I overdosed, it was Friday night"*

*"Yes we know"* Jenny began to explain, *"we were afraid of losing you in a coma, in your deep sleep you looked so Peaceful and content, glowing more than a pregnant woman. At night we talked about you glowing like a glowworm, I could see a bluish Light around you, like an aura. I still can and your eyes .....* "

Jenny could feel my happiness and exhilarating energy Love pouring out of every pore in my skin.

*“I was connected with God and all of Life,” I exclaimed, “blessed by Archangels, what a journey”*

*“So you did leave US”, Jenny said with a spark of excitement in her eyes. “First, let me get you a cup of tea and a bit to eat, lunch will be in about an hour”*

Soon after, the doctor came in, surprised to see me so happy, energetic and enthusiastic, ready to get on with living. There was no sign of depression from my overdose.

*“You’re looking well, extremely well!”* the doctor remarked.

He asked questions to form a picture of my situation. *“We know Steve all too well around here, as do the town folk, you won’t have to go back there, while the bed is available, you can stay here until we make further arrangements”*

All the staff were so friendly and helpful. The local psyche nurse, Laurie, who I met down at Mt. Barker, transferred himself up here and came in on my case. He took me around to Steve’s to collect my suitcase and art supplies, being my entire belongings. Steve was a little dazed from my suicide attempt.

*“Sorry Steve, it was all a con that wasn’t meant to be, try to get your Life back on track, firstly by disposing of the bottle. Take care, Love you Steve”* I gave him a hug and returned with Laurie to the comfortable air-conditioned hospital.

With no money and nowhere to go, Laurie lent me \$20 and left me to make phone calls down South to plan my next move.

When phoning Rene and George on the farm, my Buddhist friend Bob on his Donnybrook farm and Dinee my Christian friend from Harvey, all three offered me my first stepping stone, what beautiful caring Souls.

It was Dinee who held the key to my next door, for she had just attended a seminar in Bunbury with Mal Garvin, the founder of Fussion Australia in Tasmania, offering a new alternate Life with Christ in Poatina in the centre of Tassie, the core of the heart shaped island.

A Christian commune seemed ideal at this point, going from the brochures Dinee explained then posted up to me. It's away from the rut of society a new beginning. Dinee said the Church of Christ member will help me get there as she went about filling a hat. Dinee knew my fate.

*“Dinee, I kissed Jesus as God wrapped its arms around me as we became ONE”* Like a mother, Dinee left me at the bus stop to Kununurra, telling me she wasn't surprised of my suicide, I reached the end of my road at Harvey, but knew I would be cared for in Gods Hands and was so pleased to hear my chirpy voice again and my Heavenly visit.

With no signs of suicidal depression or mania, I was permitted to move around free as in a motel, on dusk I went for a walk outside the grounds, it was still hot in the high 30° C as I reached an incredible tranquil lagoon on the edge of the town centre, it looked fantastic as the sun began to set reflecting its beauty across the waterlily mirror water to an orange red glowing hill in the distance, I became tranquilised by its serenity, later I discovered it to be named the Sleeping Buddha. Feeling so inspired by the lagoon, I returned early at first light for the sunrise the following morning. It was Heavenly to be greeted by numerous birds singing and insects of all sorts, dragon butterflies, playful lizards.

This time, I returned with coloured pencils and a water-colour pad to prepare sketches and notes. A beautiful, white, majestic Ibis gracefully glided in from the left to virtually land delicately on a heart shaped waterlily. I could first feel Tara's Spirit in this angelic bird, then Melissa's. About ten minutes later, its playful mate appeared in the distance from where Buddha rests. I became hypnotised as it too arrived in sheer grace also landing on a lily, they appeared

to kiss or was that

my wish as I felt Melissa and  
I were sharing this paradise  
amongst God's natural haven.

Spiritually, Melissa was

sleeping as Buddha is in the distance, Resting in Peace. Six months later I produced an oil for both Tara and Melissa, what an excellent substitute from the Heaven I had just been in amongst the Light. A very meditative painting that I share with you.

I accepted my new Life to commence from Tasmania, the only State I hadn't previously visited and was keen to see its splendor, beauty. My Harvey Christian friends paid for a return flight and paid for the first three weeks accommodation, including a summer art workshop and the Foundation annual course and AGM. Dinee, thankfully, organised my ticket for the 3<sup>rd</sup> of January.

Meanwhile, leading up to Christmas, the Health Department had me flown to Perth once referred to my Bunbury Dr. Manea to stay at Bunbury Regional Hospital. Having no available beds in Bunbury, I spent ten days as a guest at Graylands, not a patient. During this free open visit, the State Elections were held and to Melissa's great disappointment, but for her own good, she just missed out on her Bunbury seat. Mel is too honest, pure and innocent to be caught in this muddy Parliamentary circus, she had more to offer than them all put together, she would only be attacked from all levels raped before being kicked out the back door. Like all boys clubs; full of smut, backstabbing and sleaziness. I was proud and pleased for her, feeling for her deeply on her election day, sharing tears with her in her loneliness and comforting family and friends support.

I did make her a delightful turquoise and bronze clay turtle that fitted comfortably in her hand to symbolise steady progress, patience and tolerance, inner strength, balance and the one that wins the race in the long run. It also taught me to now move slowly, the signs will guide me/her to be at the right place at the right time.

After one night in Bunbury Regional, where Meeta works in Occupation Therapy, she offered me a bed and cared for me with Ross, before going down to Manjimup with Dinee, Mike and the girls. School had just finished for the year, so Sue brought Tara and Simon to Bunbury

for Christmas shopping where we all enjoyed our pre-Christmas lunch. Christmas Day has never been the same without Simon and Tara but it was the next best thing on Dinee's parent's farm. What a memorable week; it was great to be part of a loving family, to be amongst young children, dressing up a real pine Christmas tree that we went out for and to be there as the girls excitement beamed on opening the presents and sitting around a large table with a full traditional dinner. Thanks Dinee and all.

Returning to Harvey for New Year's, I said my goodbyes with tears in my eyes, not realising how much I was to miss and grieve for my children 3000 kilometres away on a distant island.

I flew off with excitement in a swapped business class front seat, to an unknown frontier and adventure.

*"Will you all please fasten your seatbelts. We are about to land at Launceston Airport"*
