

# ***TYME HAZ KUM***

The End of the Mainstream and the Birthing of Ourtopia

© 2007 by NgAng

*Tyme Haz Kum* for US all to wake up to ourselves, to our true Human/Divinity, to our full potential of Enlightenment (or Christhood, if you prefer) which is a realisation, not an attainment. In truth, it is only a single thought away. I like what Ken Carey said in "The Third Millennium": "You have lived always inside the being of God. There is nowhere else to live – except illusion."

It's time to let go of all fears, to simply live Harmoniously together with all Life in Love and Peace, combining our unique individuality with a collective consciousness of Oneness with the Divine Source, in the ever-present Now of our Earthly Paradise. It's time to "Love and Let Live," both amongst the wonders and beauty of a newly rebalanced Earthly Garden of Eden, and extending out to the whole Universe, our rightful playground. This is how our Life was always intended to be.

In just a few years we enter the Divine Light of Photon Energy [see <http://www.salemctr.com/photon/center5b.html>] Are you lightening up in readiness for the Transformation? I'm here to say that the *Tyme Haz Kum!*

Humanity, sadly, is now at its deepest ebb ever, having a literally upside-down perception of Life. Since our "Separation" from The Garden some 32,400 years ago, falling out of balance we all left behind our collective God Consciousness in favour of becoming individual thinkers, falling into what can only be considered a collective human coma and a false reality. The evolution of the entire Universe has also been affected by this bottleneck in human growth. But, at long last, we are awakening – some quicker than others – and remembering the true Divinity of our Humanness. In doing so, we grow in Love and Light.

Do you remember Lao Tzu's dream? Lao Tzu fell asleep and dreamt he was a butterfly. Upon awakening, he asked himself: "Am I a man who has just been dreaming that he was a butterfly, or a sleeping butterfly, now dreaming that he is a man?" Our life is but a dream – a nightmare for some.

If we were to stand back, we would recognise the cultural, religious and political imprints reinforced by family, mainstream education system, and media which have distorted our lives. It is because of this conditioning that we are separated from one another and from our true selves, existing unconsciously in mental slavery. Societies across the globe, particularly in our Cities, have seduced most of US to succumb to a materialistic world, where many are complacently living beyond our means.

Our pseudo world systems tie us down to the workforce, with economics based on debt and usage. Most of us have become possessed by our possessions and debts; we are too busy to even contemplate as we chase the almighty dollar, along with the elusive illusion of time. Our lives are restricted and confined by ownership, making us forget our responsibility of stewardship of Mother Earth. Otherwise we would neither misuse nor destroy what enters our care and in turn we would not take material things more seriously than Life itself.

We humans have the greatest gift of all: “Free Will,” the source of all Freedom. We have a unique Divine Free Will, so why in hell even think of giving it away or selling our souls to the so-called “powers that be”? We are the only planet in the entire Universe having individual Free Will; some other planets have a collective Free Will.

Ironically, given our gift of “Free Will,” WE often choose the opposite to Love: fear, and also separation, dis-ease, illness, unhealthy habits, moods, unhappiness, pain, suffering and negative thinking processes. You’ve heard it before – We create our own reality.

Amidst the trials and tribulations in my life, I am grateful to have a new awareness from several pivotal events. I awakened initially through a pure Kundalini experience in 1976, connecting to All in the Past, Present and Future. This was followed several years later by a Near Death Experience, in which all of my then thirty eight years of life flashed through my mind in less than a second. Then in 1996, I went on the climactic journey of my life during a Death Experience of three hours, from which I returned in a three day coma. While dead, I explored 23 of the 24 major Dimensions (levels of consciousness), in communion with what I experienced as nine mighty Beings of Light. Then spontaneously I experienced even a greater Light, the twin Silver and Gold Rays of Creation. Because of these experiences, I feel Blessed to be alive and well. I now know we can never really die. The fear of anticipating death is but a painful waste of energy. I stepped over one threshold, then returned. Through it all, my mind never altered; it just expanded. Before dying, through Love, I achieved my goal to consciously returned to my Source.

I believe humankind reached its Great Turning Point on July 7<sup>th</sup> 2007 (i.e. 7-7-7), when that powerful wave of the Sacred 777 Energy vibrated out from the centre of the Earth in a Harmonic Planetary Shift which catalysed a resonating shift into our perceptual fields of awareness. Also, on the 17<sup>th</sup> and 27<sup>th</sup> of the 7<sup>th</sup> month of 2007, many people focused healing Love energy to the Earth. This shift has removed a “frequency fence” which has kept human consciousness in fear, denial and ignorance up to now. We now have a clear choice to make; fear or Love, separation or Oneness. Without this Divine prop within the Birthing process WE humans would self destruct to the negative imbalanced force taking the Earth into a major ice age within 100 years or so to severely damage the Universe. This shift has helped prepare Humanity for the birthing of a new awareness which will sweep our cellular (soul) grid during the Birthing of the Divine Masculine which Elisabeth von Madarasz explained in her recent articles (see [www.shamanic.ac.nz](http://www.shamanic.ac.nz), articles 3 and 2).

*Tyme Haz Kum* on the EQUINOX the 23<sup>rd</sup> September 2007 to gather the flowers to celebrate the Breath of Life, for it’s the Birthing of the Divine Masculine – It’s *Tyme* along with our Awakened Ancestors – for our “graduation,” our advancement day, *not* judgment day, because no one “fails.” Some of us will choose to advance into our Human Divinity of the 5<sup>th</sup> and 6<sup>th</sup> Dimensions, and a few into the Oneness of the 7<sup>th</sup>, staying on here in Heaven on Earth for 1000 years and beyond. The remainder will be transferred to another “school” in the astral 4<sup>th</sup> Dimension, much in a form that we consider as “ghosts” so to speak – suspended etherically to continue the learning much as we do at present. Our current 3<sup>rd</sup> Dimension of linear physical form and structure will be no more on earth from 2013. All memories and all history will vanish? Time to move on, only the lessons will stay with us and the rest of the Universe, with which we are intimately interconnected. We are the Microcosm and the Macrocosm, All are One.

Many of us have become very concerned about our future here on Earth, with issues around global warming and dimming, peak oil, the economy, and so forth. Many are looking towards self reliance, revitalised families, sustainable communities, alternative

## “The End of the Mainstream” Artist: NgAng

Concept statement written by the artist's partner, Lethea Erz

A witty, ironic, satiric-yet-serious visual commentary on the state of contemporary culture at the beginning of the 21<sup>st</sup> Century, this painting combines words and metaphoric symbols carefully juxtaposed to illustrate the complex interconnections amongst major world belief systems and institutions in decline: education, economics, health and welfare, legal systems, governments, religion, sport, warfare, and mass media. From personal relationships to Earth-destroying consumerism driven by corporate globalisation, all these mainstream values and social systems based on domination and the shadow aspects of human nature are shown as heading toward their inevitable conclusion.

The placement and rendering of every image makes a multi-levelled statement about the artist's view of humanity after 5,000 years of hierarchical, dualistic belief systems and social institutions based on them. The modern “pair-o'-dime” is shown heading toward its logical end-point, swept along with the natural world (symbolised by melting ice floes and endangered penguins) which humanity has so carelessly despoiled.

To the perceptive, spiritually-oriented viewer, the disappearance of unconscious mainstream culture into a visually-ambiguous vortex may be seen as necessary and even hopeful – is it a metaphoric toilet bowl connected to the cosmic sewer, or a black hole in space which *could* be the entryway to a new universe? The painting hints at healthier alternatives that humanity *could* embrace, even now. A galaxy of new possibilities awaits those with imagination and courage.

The old worldview can't be saved; struggling against the current or continuing to “go with the flow” only accelerates our descent “down the gurgle.” What is needed is nothing less than total transformation, and the rainbow trout emerging from the canvas, with its gills evolving into wings, hints that a natural alternative exists above and beyond the two-dimensional “reality” we've created. The shift toward quantum consciousness begins where the old system ends – in the Centre, where the macrocosm and microcosm merge. Each of us has a choice: to remain caught in the crap we've produced, swirling downward toward oblivion, or to fly free using our natural evolutionary potentials.

The first step toward humanity's transformation is to break through the denial which keeps us from even recognising our peril. The Aquarian artist's view-from-above may provide a more effective wake-up call than thousands of studies and pronouncements by scientists, politicians, religious leaders and social critics whose entrenched positions within the decaying systems rightly make them suspect.

The backdrop to “The End of the Mainstream” is “Gaia's Cleansing,” in which we witness a newly formed Earth unfolding through the Magdalene Flame. The Pacific Rim ignites in volcanic eruptions and earthquakes open new lands and close old ones across the globe. The world maps are redrawn as many new species develop in harmony with Nature. Through the use of fluoro paints and an ultraviolet/black light, the glowing Earth comes to Life in our solar system.

“Gaia's Cleansing” centre detail

Continued on next page...

With this mainstream collapse well underway – “out with the old and in with the new” – it became necessary to envision “the new.” So I went about creating an artwork to illustrate the balanced, healthy, evolving Future of Divine Humankind: “Birthing Ourtopia,” shown later in this article.

For virtually all of written history (and as far back as 26 million years ago, as many people believe), human beings have been at war with each other, and increasingly with the Earth, in modern times. I say *Tyme Haz Kum* for this craziness to stop! It’s time to face Truths that will set us free: truths about human history and our potential, truths about who and what we really are and our families, truths about our real, Divinely-Sourced Human Nature. [Before I condensed this paragraph, I wrote 3 ½ pages on our important history that influences our attitudes and behaviours today. I’ve decided to make the history a separate article following this one, to be added later.]

We have all been “Universal Soldiers” over time, but there has never been a *real* need to fight. So let’s lay down our fears and weapons and learn from Mother Earth’s school of Love and Wisdom. As ageless Students of the Universe, let’s explore the entire framework of existence. We can challenge and stretch our own beliefs about Life, death, dreams, time and space, which will leave us with a refreshing and provocative perspective on the true nature of reality.

We are real Peace *Makers* (you can’t “fight for Peace”). Peace is our key, our passport, to solar secrets and the Universe’s mysteries. Peace is the highest form of Love. Love is our Path and Peace is our God-expression. There are many Love songs to help us feel connected and stir our emotions: “What the World Needs Now is Love Sweet Love...”, “I Want to Know what Love is...” Do we really know Love?

Love is the most powerful force in the Universe. It is that great psychological force that can completely transform US. Love is an incredible energy that is with us at all times. We carry it within us; Love is what WE ARE, although with our minds we can create the satanic opposite. We can feel Love and see its effects. We know Love, but like Wisdom, we often don’t see it. We are Love, just as Love is God and God is Love.

It may sound somewhat strange, even ridiculous, but in reality all molecules are suspended in Love (like a glue) which carries each molecule to its destination to make up each chemical process. God is in each and every cell of all living matter, in each cell in our bodies. Love/God holds us together. Love is the most powerful energy source, always at hand. Love is in the air and can be used just as electricity is today. Instead of burning fossil fuels, we can teleport ourselves using Love. Telepathic communication happens through Love, so why pay for telecommunications? Love is Free; cannot be measured or contained.

The way I see it, the Key to Life is “LOVE EXPRESS” – period! We all hold that key; we just need to place it in our heart and turn it. We are HumanKIND – if we so choose. Kindness is Love in Action. Unlike Love and God, Kindness cannot be taken or misused, you either give or receive it. Simply be Peaceful KINDhumans! Happiness is found in helping others and doing to others the way we would like others to do to us. We know that, so let’s do it.

There is absolutely nothing we’ll need to take into “Ourtopia” except ourselves (Love). We have it all; we are just required to GIVE from our hearts through our Divine Aspects: Divine Wisdom, Truth, Love and Peace, Will, Justice, Order and Balance, Patience and Tolerance, Light and Sound.

When we are all giving, we are in a state of Love; we are being Godly Goddesses, happily, with no needs. Living in equilibrium. There are no conditions nor taking, in Loving. No Hierarchy. In this giving and sharing and receiving, we will grow in all levels of our lives, to be enriched personally as well as in community and as an overall Family. In today's troublesome selfish "me-my-mine" world of "take-take," where survival requires having and owning more and more. However, Nature has brought to our attention that we must be in harmony with *Her* to sustain ourselves. The more fearful and out of balance we become, the stormier our lives are. Love and Peace bring a perfect glorious day.

As far as I am concerned, the greatest challenge we have as humans is to discover the mystery of ourselves. In doing so, we will discover the real God and everyone else in the process to be "in Love" and then we will live as *Humankind*. Self mastery is our goal.

Our wise teachers have said:

- "Teach this triple truth to all: A generous heart, kind speech, and a life of service and compassion are the things which renew humanity" – The Buddha
- "I object to violence because when it appears to do good, the good is only temporary; the evil it does is permanent." – Mahatma Gandhi
- "What I want in my life is compassion, a flow between myself and others based on a mutual giving from the heart." Marshall Rosenberg.

*Tyme Haz Kum* to move with Mother Earth as she physically changes. Historically, Earth travels through space at approximately 18,000 miles per hour, but she is currently speeding up, and will be travelling at just over 200,000 miles per hour when we enter Photon. The faster we go, the lighter we become. It is thought that only three percent of the three billion components of human DNA is currently functional. Using so little of our potential is like trying to play a 12 string guitar with just one pair of strings. In "Birthing Ourtopia," we need to reassemble our single-paired DNA to its former six double-stranded DNA molecules for full consciousness complement of 12 helixes. To do this, we must activate a higher 13 chakra system, expanding the traditional 7 body energy centres to work in with the new semi-etheric bodies we'll need to survive in the Photon Light sphere. In our current dense physical state, we can only turn to dust from internal combustion when we enter the Photon Belt.

On my return from Spirit in 1996, I saw hundreds of humankind who were sufficiently "enlightened" to survive Photon Energy, come 2012. In 2007 I see thousands, and I foresee hundreds of millions – not billions as now inhabit Earth – by 2012. So it's clear that more and more people *are* awakening. Here's hoping everyone will choose Love over fear, to become Light Hearted, Light Bodied, and Light Spirited.

This saying from Rumi applies to 'Ourtopia'. Out beyond ideas of wrong doing and right doing, there is a field. I'll meet you there.

Here is the painting, along with the artist's Concept Statement for "Birthing Ourtopia," which Lethea and I wrote together. By displaying these two paintings with the appropriate backdrops – "Gaia's Cleansing" for "End of the Mainstream" and "Perfect Spiral Galaxy" for "Birthing Ourtopia" – the installation "Tyme Haz Kum" is created. This was unveiled at the 2007 Golden Bay Art show on the 20th October, which completes its 28-year journey of creation-to-production beginning with my painting "Passing Time" in 1979. So, as of 11 November 2007, with the placement of this article on my website, I now put it out for the world to contemplate, and also as a serious wake-up call to humanity.

means “no place”) – but a realistic, possible Heaven on Earth. With Ourtopia, we can return full circle to the original Garden which ancient myths describe, a time before humanity’s Fall into domination of the Earth, Nature, and each other.

Multiple layers of images and meanings frame this birth/rebirth. The outer petals of the Peace Rose are also the Cosmic Yoni through which all life emerges, purified by the Magdalene Flame which symbolises the reemergence of the Divine Feminine. In partnership with the newly reborn, life-nurturing Divine Masculine, this new balance fosters human societies based on all the Divine aspects of Life: Love, Wisdom & Peace, Will, Justice, Order & Balance, Patience & Tolerance, and Light & Sound. Honouring these principles, we can create Divine equilibrium, living peacefully as One Family, in harmony with Gaia and the rest of Nature according to the Sacred Geometry which underlies the structure of all that exists.

Birthing Ourtopia is centred both literally and symbolically in the Heart, and at the heart of humanity’s happiness is the Freedom to give and receive, in love and balance. Thus, emanating outward from the fresh golden Freedom Rose, eight hands offer infinite gifts, which are graciously received in an constant ebb and flow of generosity and sharing.

Rather than depend on rules from above, as mainstream cultures did, in Ourtopia we know that we all hold the Golden Key to Life, which is ‘LOVE EXPRESSED!’ The divine potentials depicted in the painting exist equally in each of us, once we reclaim our belief in our own empowerment. We are all “Godly Goddesses,” able to heal our Selves and our planet, beginning one Heart at a time.

Within a loving community with a sustainable, self reliant local economy in place, we here in Golden Bay have an opportunity to create a model for the rest of the world. Our Code of Ethics, Morals and Values, growing from our sense of interconnection and interdependence with all that exists, prepares us perfectly to enter the Divine Light of Photon (Love) Energy in 2013.

The backdrop for this emerging Ourtopia is the Perfect Spiral Galaxy, which reminds us that in creating our Heaven on Earth, we also contribute to Co-Creating a Perfectly Balanced Universe.

**From the Equinox in September 2007, with the Birthing of our Divine Masculine out of the Divine Feminine, those of us who choose to do so can experience ourselves blossoming like the rosebud as it unfolds in the springtime, and watch ourselves fly as the butterflies do. Like butterflies, we do not all emerge from our chrysalis in unison, nor do we all awaken from our collective human coma on the same day. Yet we are all stirring and stretching, sobering up our minds, and opening our hearts and our eyes to the wonders of Life. From here we can create a New Perfect 13<sup>th</sup> Universe of the Divine in a more evolved manner than the very first Perfect Divine Universe.**

**Blessed Be!**

NgAng
